BEAUTY ON A BUDGET Castilian offers an exciting collection of beautifully distinctive styles at a surprisingly low price. The broad range of rich colors and decorative patterns make Castilian the practical choice for a variety of home areas. In addition, a foam inner layer provides built-in warmth, quietness, and underfoot comfort.

DURABILITY But don't be swayed only by looks and comfort. Castilian can take a beating and bounce back for more. The design is protected by a layer of tough, durable vinyl that provides long wear and easy maintenance features.

DO IT YOURSELF In addition to its economy-minded price, Castilian can save you even more on installation costs. Castilian comes in big 12' widths as well as standard 6' widths, making it possible for the home handyman to install a perfectly seamless floor in many areas. And, unlike most sheet vinyl floors, 12'-wide Castilian can be loose-laid without adhesive in certain room situations. Your retailer should confirm how to best install Castilian in your home.

INSTALLS ANYWHERE You don't have to worry about where you should install Castilian, because it features a moisture-resistant Hydrocord® Back that permits installation on all grade levels—even over concrete (except under abnormal conditions of alkaline moisture and hydrostatic pressure).

Please use actual samples for final color selection. Printing limitations make it impossible to guarantee exact color matching in this folder.
